1	<p>How does ECC call a material versus how would APO and Rapid Response call a material/product?</p> <p>ECC (SAP ERP Central Component) Material: In ECC, the term "material" is used to refer to items that are managed within the system. Each material is identified by a unique material number (MATNR) and is maintained in the material master record.</p> <p>APO (SAP Advanced Planning and Optimization) Product: In APO, the term "product" is used instead of "material." When data is transferred from ECC to APO, materials are referred to as products. This is part of the master data integration process where ECC material master data is CIFed (Core Interface) to APO.</p> <p>Rapid Response</p> <p>Part: In Rapid Response, the term "part" is used to refer to items that are managed within the system. This aligns with the terminology used in supply chain planning and execution</p>	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No		8 sec	<input type="checkbox"/> 5 best <input checked="" type="checkbox"/> 4 <input type="checkbox"/> 3 <input type="checkbox"/> 2 <input type="checkbox"/> 1 worst	<input checked="" type="checkbox"/> 5 Very Satisfied <input type="checkbox"/> 4 Satisfied <input type="checkbox"/> 3 Neutral <input type="checkbox"/> 2 Unsatisfied <input type="checkbox"/> 1 Very unsatisfied	<p>"I rated the answer's accuracy a 4 because it was very accurate in my opinion; however, I think it could have been even more precise. My overall satisfaction is the highest possible rating because the accuracy is good enough, so I am satisfied."</p> <p>"Answer is at the point and accurate, however I would have expected the reply coming (also) from other sources: and WI-3360"</p>
